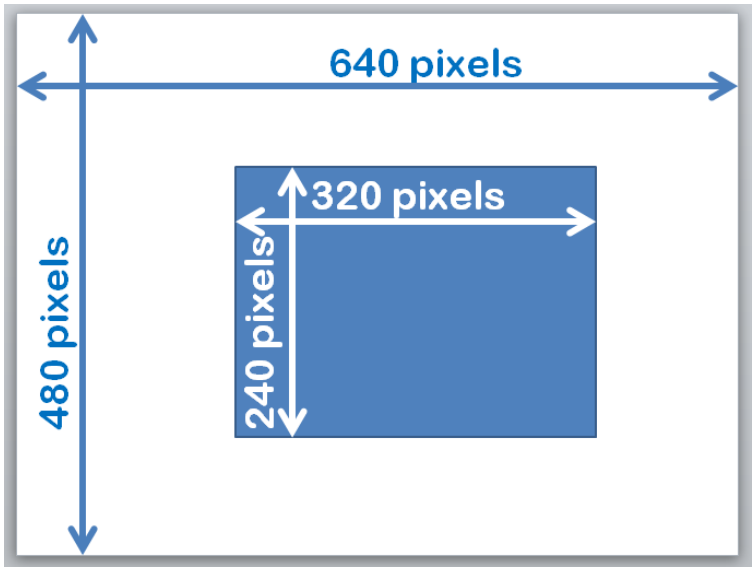
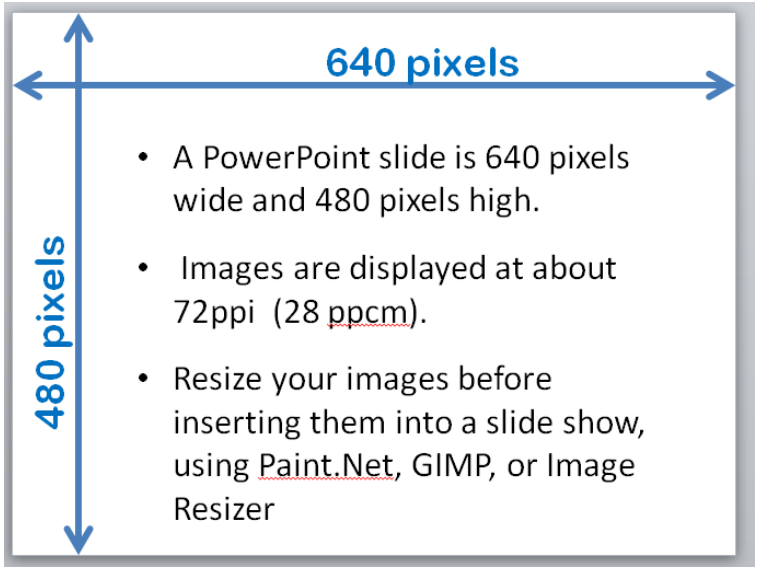
Landscape Task

To Do:

1. Select your four best landscape images. One of these should be a panorama.
2. Resize each to 72 dpi using Paint.Net or Gimp. The width will be 640 pixels or less. The height will be 480 pixels or less. The picture should be kept in the proportion of the original, ie. not stretched.
3. Save each as a *.jpg image (finished)
4. Insert your images into slides in a PowerPoint slideshow.
5. On slide five write a brief reflection on landscape photography and the tools you used this week.
6. Save your Power Point as YourName-F2.pdf (portable document format)

Upload your slide show to Knowledge.Net, through the assignment facility on your class page





Done

Thankyou
